```
enable
configure terminal
line console 0
password test123
login
exit
enable password test1234
enable secret secret1234
service password-encryption
exit
copy running-config startup-config
show startup-config
```

enable
! Enables privileged EXEC mode

configure terminal
! Enters global configuration mode

line console 0
! Enters the console line configuration mode

password test123
! Sets the console line password to "test123"

login
! Enables login authentication using the password set above

exit
! Exits the console line configuration mode

enable password test1234
! Sets the enable password to "test1234" for privileged EXEC mode access

enable secret secret1234
! Sets the enable secret password (encrypted) to "secret1234" for higher security

service password-encryption
! Encrypts all plain text passwords in the configuration file for added security

exit
! Exits global configuration mode

copy running-config startup-config
! Saves the running configuration to the startup configuration so it will be used on next reboot

show startup-config
! Displays the startup configuration file (saved configuration)
